

(a)

(b)

		Response to warmer spring T			
		SCBI		Harvard Forest	
Variable	Definition	RP	DP	RP	DP
Timing of growth					
$DOY_{25}$	day of year at which 25% of growth is achieved	↓	↓	↓	↓
$DOY_{50}$	day of year at which 50% of growth is achieved	↓	↓	↓	↓
$DOY_{75}$	day of year at which 75% of growth is achieved	-	↓	↓	↓
$L_{PGS}$	peak growing season length ( $DOY_{75} - DOY_{25}$ )	-	-	-	↑
Growth rate					
$g_{max}$	maximum growth rate	-	-	↓	↓
Annual growth					
$\Delta DBH$	annual growth	-	-	↓	-
$RWI$	ring width index from tree-ring chronologies	mixed	mixed	-	mixed
