

(a)

(b)

		Response to warmer spring T			
		SCBI		Harvard Forest	
Variable	Definition	RP	DP	RP	DP
Timing of growth					
DOY_{25}	day of year at which 25% of growth is achieved	↓	↓	↓	↓
DOY_{50}	day of year at which 50% of growth is achieved	↓	↓	↓	↓
DOY_{75}	day of year at which 75% of growth is achieved	-	↓	↓	↓
L_{PGS}	peak growing season length ($DOY_{75} - DOY_{25}$)	↑*	-	-	↑
Daily growth rate					
g_{max}	maximum daily growth rate	-	↑*	↓	↓
Annual growth					
ΔDBH	annual growth	↑*	↑*	↓	↓*
RWI	ring width index from tree-ring chronologies	mixed	mixed	-	mixed

*statistically significant, but effect size small ($\leq 3\% \text{ } ^\circ\text{C}^{-1}$) and unlikely to be of biological significance
